Unequal pairs – Weaving on the TC1 and TC2

The digital manual Jacquard loom allows you to quickly create designs and ideas in fabrics. Inspired by the theme „Garden of Eden“ you will develop two fabrics that together can make a pair. The two instructors will show you different ways of doing this: you can try two looms, the TC1, the first digital hand Jacquard loom, and the TC2, an improved development from Digital Weaving Norway. The creation of the digital file to control the loom can be done in Photoshop, or in the CAD program Arahne. Your digital file may be a design or a photograph. Both planning and know-how as well as experimentation and creativity are required to explore the multitude of design possibilities and to find an individual approach.
